In response to the Notice of Allowability dated November 30, 2005, Applicants respectfully submit the following Comments on Statement of Reasons for Allowance.

Applicant wishes to thank Examiner Edan for allowing claims 1-20 in the above-referenced patent application. Applicants recognize the statements on page 2 of the Examiner's statement of reasons for allowance. However, Applicants cannot acknowledge these statements for the purposes of prosecution history estoppel, as they do not correspond to the recitations of the claims word-for-word. For example, claim 10 recites allowing said active terminal to request said current radio network controller to permit its change to one of a dormant state and an active state when the determination is that said active terminal is to perform the handoff operation in said suspended state and

combinations thereof. Further, Applicants respectfully submit that each dependent claim is allowable for at least the additionally recited features therein. In addition, Applicants respectfully submit that a combination of features less than the entire claims may define patentable subject matter.

Accordingly, Applicant respectfully submits that the scope of the allowed claims should not be limited by the Examiner's statements.

Respectfully submitted,
